George Engelmann M.D
3003 Locust St Louis

Dear Sir

I have quite a collection say 300 to 500 specimens of dried plants which I have collected in N. Mexico Arizona Ana in Dakota & Minnesota.

The work has been hastily done but the specimens are in fair order, owing to the business which I follow I cannot get the time in which to make a study of them I am a civil engineer on what terms would you buy take them and make out the species and a brief catalogue of them for me. I am truly yours

C. W. Irish
